Restaurant Select the food items, quantity and add to cart, Check out the cart. Restaurant

Admin can Add, Delete or Update the food items. Accept or Reject the orders

Milestones

1. **Customer Dashboard**

   Customers can register, Select the food items, quantity and add to Cart. Place order of Food items are in the cart. List of past orders

2. **Restaurant admin Dashboard :** Restaurant admin can register. Add,Delete or Update the

   Food items. Accept or Reject the orders,

3. **Hosting Website**

   Hosting a mern stack website is a double task. We need to host api, use that api in our

   React app and then we need to host react app
